

COFFEE IN A PANDEMIC?

issue

Because of fear of covid spread, most coffee shops will no longer take reusable cups

so?

Why is this an issue? The increase in single use cups has a huge effect on our waste streams

WHAT CAN WE DO?

1.

When making a pot make extra and keep it in a container in the fridge, this can then be reheated or used for a cold brew!

2.

Purchase the coffee you love in bulk! Many brands sell their coffee and mix-ins for you to use. It is both better for the environment and more cost effective!
